RuralMED Mobility | Interreg Euro-MED

Co-funded by the European Union

RuralMED Mobility

OUR PROJECT

The RuralMED Mobility project is aimed to adopt electric mobility in underserved rural and remote mediterranean areas. As test project, several investments are planned in different regions and countries across the mediterranean areas. These investments will be monitored and the data will be used to facilitate the decision-making process by the policy makers. They are addressed to reduce the impact of transport in rural areas, reduce CO_2 emissions, to support the integrated planning and financing of EV charging infrastructure, promote the low carbon mobility and improve the connection of urban and remote rural areas.

Total budget
€ 2,856,363.90

Project duration
33 months

Interreg Funds
€ 2,285,091.12
